#### Locally

There are no current active positive COVID-19 cases in Cherokee County. Cherokee County has a test rate of 6.67 per 1,000 residents, having completed 133 tests, according to the Kansas Department of Health and Environment.

#### Statewide

Across the state, there are 3,174 positive cases reported, 485 hospitalizations, 118 deaths and 23,053 negative tests. These total numbers are an increase in the numbers reported yesterday by the Kansas Department of Health and Environment, which were: 3,056 positive cases, 474 hospitalizations, 117 deaths and 20,811 negative tests.

As per previously planned, there was no 1:00 statewide partner call today.

As of the time of this email, there have been no additional Executive Orders issued.

#### Nationally

The United States is reporting 957,016 total positive cases, which includes 54,435 deaths. In the U.S., 106,366 patients have reportedly recovered.

Below is our local daily report.

Thanks,

Sheriff David Groves
